Colombo - Sri Lanka

OBJECTIVE

I am a detail-oriented undergraduate student pursuing a Bachelor of Science in Information Technology, actively seeking opportunities in the data science field. I aim to apply and expand my knowledge, work on real-world data challenges, and contribute to data-driven decision-making. I have a strong ability to meet deadlines and a creative mindset, which allows me to derive innovative solutions and overcome challenges. Additionally, I excel in teamwork and possess strong communication and social skills.

EDUCATION

- Sri Lnaka Institute of Information Technology (SLIIT) BSc (Hons) in Information Technology** September 2022 - Present
Malabe, Sri Lanka
- Ak/ Muslim Central College (NS) Secondary Education (A/L) Technology Stream** December 2019 Akkaraipattu, Sri Lanka

EXPERIENCE

- Business Analytics (Intern) - Microweb Global Pvt Ltd** Nov 2024 - Oct 2025
Tools: Excel, Power BI, SQL, Jira, MS Office 365
Requirement Analysis & Documentation: Conducted detailed business analysis, gathered requirements, and documented workflows to improve system functionality.
Process Improvement: Analyzed existing business processes and suggested optimizations to enhance operational efficiency.
Data Analytics & BI Integration: Assisted in data-driven decision-making by leveraging Power BI to create interactive dashboards and reports.
Practical Application: Collaborated with cross-functional teams to successfully optimize workflows, showcasing the ability to apply data analytics tools to solve real-world business challenges.

PROJECTS

- IMDB Movie Review Sentiment Analysis Project** Oct 2025
Tools: Python, TensorFlow, Keras, NLP
Deep Learning with RNN: Designed and implemented a Recurrent Neural Network (RNN) to classify IMDB movie reviews as positive or negative, capturing sequential text patterns and contextual dependencies.
Data Preprocessing & NLP: Applied text preprocessing, tokenization, and word embedding techniques using Keras to transform raw movie reviews into numerical sequences suitable for deep learning models.
Model Optimization & Evaluation: Utilized Dropout and L2 regularization to reduce overfitting, performed threshold tuning to improve F1-score, and evaluated performance using Accuracy, Precision, Recall, and F1-Score metrics.
- Wave X Project** May 2024
Tools: Python, Power BI
Data Cleaning with Python: Utilized Python libraries such as Pandas and NumPy to preprocess and clean raw datasets, ensuring data accuracy and consistency for analysis.
Enhanced Data Visualization Skills: Applied advanced Power BI features to transform complex data sets into meaningful visualizations, improving decision-making capabilities.
Data Analytics Experience: Leveraged hands-on experience in analyzing real-world data, developing interactive dashboards that provided actionable insights.
Practical Application: Successfully completed the Wave X project, demonstrating the ability to use data analytics tools to solve business problems.

SKILLS

- **Programming Languages:** C++, JAVA, Python, SQL, R, Kotlin
- **Database Systems:** MySQL, MongoDB, SQLite
- **Data Science & Machine Learning Tools:** Jupiter Notebook, Google Colab, Hadoop, Apache Spark, BeautifulSoup, Scrapy, Snowflake
- **Version Control & Other:** GitHub, Jira, Microsoft Office 365
- **Cloud Platforms:** Familiarity in AWS, MS Azure, Google Cloud services.
- **Specialized Area:** AI/ML, Data Analytics, Data Wrangling, Data Visualization with Power BI, Data Clustering & Classification, Web Mining, Web Scrapping, Building & Optimizing ETL workflows, Data Pipeline, Data Manipulation

LANGUAGES

- **English:** Professional Proficiency
- **Sinhala:** Intermediate
- **Tamil:** Native Speaker
